

Custom software development

Our team of international programmers develop ALL our own 'out-of-the-box' VISION software packages, and our specialist installations, at our technical centre in Dar es Salaam; so we know we can provide you with the 'EXACT' solution to suite your company needs.

To cover the complicated functions and critical areas, or otherwise to fill requirements that existing software cannot, we can also develop customized database management systems.

Custom software development by us is often a matter of building a house upon a solid foundation which can be done quickly and with top-notch quality designed to meet every client's needs.

We customize our services according to each client's special needs by employing flexible service models drawn from years of experience.

We continue to stay in touch with the latest IT developments, and train our developers to international standards in order to produce high quality software solutions, that meet today's demands.

We design and develop windows applications and web-applications using the latest technologies and development platforms such as:

- UML (Unified Modeling language)
- Visual Studio
 - C#
 - VB.NET
 - ASP.NET
- AJAX
- MS SQL Server
 - SSIS
 - T-SQL
 - SSAS
- Microsoft Office Development / Integration

- SSRS reporting
- .NET Framework
- JAVA script
- JQuery
- CSS
- Crystal Reports
